

Features

Stereo Cable

USB Cable

Installing the RM-100EX on your handlebar

1. Find spot on your handlebar wide enough to install your radio.
2. As illustrated, wrap the silicon strap under the handlebar and use the hook to secure the radio.
3. Make sure the radio is securely fastened.

How to recharge

1. When USB Cable for recharging is plugged in, Charging begins.
2. Recharging :  red lamp lighting on (left of On/OFF button)
Full charge : lamp off

Functions

Speaker

1. When an MP3 player connected with Stereo Cable is plugged in, the volume is adjusted through the MP3 player. The auxiliary jack cannot be used for earphones
2. When an RM-100EX used only as a speaker, power does not consume.

Radio

1. When you turn on the power, the blue lamp is on.
2. When the blue lamp is off, the RM-100EX is discharge. At this point, you may experience noise. Please recharge using USB Cable.
3. When power on/off changes, remember the old frequency. But, if you use the Stereo or USB Cable, previous radio frequency will be reset. Please refer the usage.

Information

1. The antenna can be wound around the handlebar or front cables.
2. Hold the on/off button down for about 2 seconds to turn radio on or off.
3. This product is rain-proof, but it is best not to use it in heavy rain.
4. Auto scan's accuracy may vary depending on your geographical position.
